

Motivation Letter

I am **Bhavan, Baskar** an Indian national. I'm writing to show **FAU Erlangen's Master of Science in Data Science program** interests me. The ability of data to influence choices and inspire inventions has always captivated me. Through my academic path and real-world experience, this curiosity only has been more intense.

The **Bachelor of Technology degree in Information Technology** which I obtained from Anna University Chennai India demonstrated my commitment to academic achievement through my **8.17 CGPA (German Grade: 2.0)**. My undergraduate program consisted of Engineering Chemistry, Programming in C, Digital Principles and System Design, Operating Systems, Computer Networks, Mobile Communication, Cryptography, and Network Security to establish fundamental knowledge of computer science concepts. Before, starting my undergraduate studies, I passed the State Board of School Examinations Higher Secondary Second Year Examination (12th Class) in Tamil Nadu India. My Secondary School Leaving Certificate Public Examination (10th Class) **scores 82.8% (German Grade: 1.7)** from subjects Tamil, English, Mathematics, Science and Social Science at the same board. I developed my technical abilities by conducting research through the project "**A 3D Steganalytic Computation and Steganalysis Safe Watermarking.**" The research initiative examined ways to advance communication network security through enhanced privacy solutions in cryptographic applications. Implementing histogram canisters and Gaussian distribution models through this project enhanced data security standards, a major advancement for the cybersecurity domain. In terms of professional experience, I **interned in Python with Data Science at the National Small Industries Corporation Limited, Chennai, India** in June 2023. I gained practical experience in analyzing data, data visualization, and implementation of machine learning solutions which enhanced my knowledge of the data science processes. I have also completed several technical certifications to improve my skills in the field. I also managed to complete a certified course in **Python programming** offered by CodeChef that enhanced my programming and analytical skills. Also, I took the **Rashtrabhasha Examination in Dakshina Bharat Hindi Prachar Sabha, Madras, India** (April 2017) and got 2nd class rank, which proved my bilingual or multi-lingual skills. To further support my international studies, I have attained an **IELTS overall score of 6.5 (CEFR Level B2)**. Also, I Completed 16 years of Education in the English Language.

During my undergraduate studies, especially while working on the steganalysis project, my interest in data science started. I came to see how much data might help to address practical issues and enhance quality of living. FAU Erlangen's program provides a complete course covering both theoretical and pragmatic sides of data science. The chance to participate in research initiatives and pick knowledge from subject-matter specialists excites me much. For example, I find very fascinating courses in Machine Learning, Data Mining, and Big Data Analytics. These classes will, in my opinion, provide me with the knowledge and tools needed to create intelligent systems capable of handling challenging problems.

FAU Erlangen appeals especially to me because of its excellent academic standards and solid reputation. The university's ranking among Germany's best universities says volumes about its caliber of instruction. FAU Erlangen's modern facilities and active student population make me sure it will provide rich surroundings for my studies. The work of eminent teachers and research facilities connected with the Data Science program also motivates me. With its rich cultural legacy and technical innovations, Erlangen presents many chances for professional development. Local businesses aggressively hunt FAU Erlangen graduates, which fit very well with my professional goals.

Germany's outstanding educational system—which is renowned for its quality—is why I want to study there. Germany is where I wish to remain because; this country offers superior educational possibilities for the subject of data science. I want to encounter the German culture, variety, and excellent exposure. Germany has a combination of academic and practical knowledge; hence I wish to choose it for my master's degree. Studying in Germany helps me to develop personally as well as professionally. I would want to investigate the rich cultural legacy and contemporary developments Germany has to offer.

Short term, I want to get a senior job where I can oversee initiatives motivated by data driven business process improvement and innovation enhancement. **Long term,** I want to work as a data science professional helping to support innovative research and development initiatives. By playing a major part in a worldwide IT business or in academia, I aspire to significantly influence the direction of data science. Attaching FAU Erlangen will provide me the required tools and expertise to reach my objectives.

Ultimately, the Master of Science in Data Science program at FAU Erlangen excites me. The thorough course of the program, along with the university's first-rate resources and encouraging surroundings, will offer the ideal basis for my academic and professional development. The chance to be a member of the vibrant community at FAU Erlangen and help to advance the subject of data science excites me.

I value your giving my application some thought.

Sincerely,
Bhavan, Baskar
