

Statement of Purpose

I go under **Bhavan, Baskar**. Having finished my academic program in Information Technology from Anna University, Chennai, and completed industry training in Python with Data Science, I am now eager to further my knowledge and abilities in the area of Computer Science. At **GISMA University**, the **Computer Science** curriculum really meets my goals. The program will enable me to acquire the necessary knowledge to guide technical developments and assist companies in the modern complicated environment.

The **Bachelor of Technology degree in Information Technology** which I obtained from Anna University Chennai India demonstrated my commitment to academic achievement through my **8.17 CGPA (German Grade: 2.0)**. My undergraduate program consisted of Engineering Chemistry, Programming in C, Digital Principles and System Design, Operating Systems, Computer Networks, Mobile Communication, Cryptography, and Network Security to establish fundamental knowledge of computer science concepts. Before, starting my undergraduate studies, I passed the State Board of School Examinations Higher Secondary Second Year Examination (12th Class) in Tamil Nadu India. My Secondary School Leaving Certificate Public Examination (10th Class) **scores 82.8% (German Grade: 1.7)** from subjects Tamil, English, Mathematics, Science and Social Science at the same board.

I developed my technical abilities by conducting research through the project "**A 3D Steganalytic Computation and Steganalysis Safe Watermarking**." The research initiative examined ways to advance communication network security through enhanced privacy solutions in cryptographic applications. Implementing histogram canisters and Gaussian distribution models through this project enhanced data security standards, a major advancement for the cybersecurity domain. In terms of professional experience, I **interned in Python with Data Science at the National Small Industries Corporation Limited, Chennai, India** in June 2023. I gained practical experience in analyzing data, data visualization, and implementation of machine learning solutions which enhanced my knowledge of the data science processes. I have also completed several technical certifications to improve my skills in the field. I also managed to complete a certified course in **Python programming** offered by CodeChef that enhanced my programming and analytical skills. Also, I took the **Rashtrabhasha Examination in Dakshina Bharat Hindi Prachar Sabha, Madras, India** (April 2017) and got 2nd class rank, which proved my bilingual or multi-lingual skills. To further support my international studies, I have attained an **IELTS overall score of 6.5 (CEFR Level B2)**. Also, I Completed 16 years of Education in the English Language.

Personal experience that piqued my curiosity in computer science led me to desire to pursue this discipline. Growing up, my family struggled with antiquated technologies, which inspired me to provide answers using programming. Pursuing a degree in information technology came from my need to address practical issues. Strong foundations have come from the courses I studied—Cryptography and Network Security, Operating Systems, Mobile Communication, and Cryptography. Classes on artificial intelligence, the Internet of Things, and digital business technologies really pique my curiosity. These domains are very vital for creating solutions fit for the current corporate environment to be included into.

For various reasons, GISMA University strikes out as unique. The university's position and strategic location in Germany, a nation renowned for technical innovation, fit me well for graduate study. Strong ties to sectors and a concentration on practical learning by GISMA fit my goal of acquiring practice-oriented professional knowledge. The university's contemporary buildings, seasoned teachers, and varied student population will provide a stimulating setting for both intellectual and personal development.

Germany's great reputation for higher education and dedication to advancing science and research help me to desire to study there. The German way of life and the exposure to other cultures will let me develop both personally and professionally. Germany is the ideal place for my studies because of its strong research environment and focus on excellent education. I want to fully engage myself in Germany's rich cultural legacy and seize the many chances for professional growth.

Following this program, I want to land a leadership role at reputable firms such as **Siemens, Bosch, or Volkswagen** where I may put my abilities in improving technology and applying ideas to use. With goals of launching my consultancy to help companies in using technology developments and promoting a culture of innovation, my overall career target is to be acknowledged as an expert in the area of Computer Science.

The GISMA University Computer Science curriculum will definitely provide me with the required knowledge and abilities. Having a good academic foundation and a love of technology drives me to achieve. Joining the intellectual community of your prestigious university will be an honor for me to help to improve society.

Sincerely,
Bhavan, Baskar
