

Statement of Purpose

Driven and aspiring Indian **Bhavan, Baskar** is inspired to pursue a **Master's degree in Applied Data Science and Analytics at SRH Hamburg**. Completing graduate studies at your prestigious institution will enable me to build on the solid basis in information technology that my academic background and professional experiences have generated. I just completed my Bachelor of Technology in Information Technology in Chennai, India Anna University.

The **Bachelor of Technology degree in Information Technology** which I obtained from Anna University Chennai India demonstrated my commitment to academic achievement through my **8.17 CGPA (German Grade: 2.0)**. My undergraduate program consisted of Engineering Chemistry, Programming in C, Digital Principles and System Design, Operating Systems, Computer Networks, Mobile Communication, Cryptography, and Network Security to establish fundamental knowledge of computer science concepts. Before, starting my undergraduate studies, I passed the State Board of School Examinations Higher Secondary Second Year Examination (12th Class) in Tamil Nadu India. My Secondary School Leaving Certificate Public Examination (10th Class) **scores 82.8% (German Grade: 1.7)** from subjects Tamil, English, Mathematics, Science and Social Science at the same board.

I developed my technical abilities by conducting research through the project "**A 3D Steganalytic Computation and Steganalysis Safe Watermarking**." The research initiative examined ways to advance communication network security through enhanced privacy solutions in cryptographic applications. Implementing histogram canisters and Gaussian distribution models through this project enhanced data security standards, a major advancement for the cybersecurity domain. In terms of professional experience, I **interned in Python with Data Science at the National Small Industries Corporation Limited, Chennai, India** in June 2023. I gained practical experience in analyzing data, data visualization, and implementation of machine learning solutions which enhanced my knowledge of the data science processes. I have also completed several technical certifications to improve my skills in the field. I also managed to complete a certified course in **Python programming** offered by CodeChef that enhanced my programming and analytical skills. Also, I took the **Rashtrabhasha Examination in Dakshina Bharat Hindi Prachar Sabha, Madras, India** (April 2017) and got 2nd class rank, which proved my bilingual or multi-lingual skills. To further support my international studies, I have attained an **IELTS overall score of 6.5 (CEFR Level B2)**. Also, I Completed 16 years of Education in the English Language.

The rigorous course of the Applied Data Science and Analytics program at SRH Hamburg, which blends academic knowledge with practical applications, appeals particularly to me. Modules like "Big Data Analytics" and "Machine Learning," which will help me to better grasp data processing and predictive modeling, really pique my curiosity. This program's learning results will, in my opinion, equip me with technical knowledge as well as interpersonal skills, therefore benefiting both personally and professionally.

Germany is where I want to study as outdoor education there is more better. I want to come across the German variety, culture, and fantastic exposure. I want to live in a civilization distinguished for its ingenuity, efficiency, and discipline. Germany offers outstanding education, and a worldwide atmosphere, hence I wish to apply for my master's degree there. Studying in Germany will enable me to develop personally as much as professionally. It is the perfect place for my further studies because of the rich German culture and its focus on excellent education

SRH Hamburg fits rather well for my graduate study. The university's standing and more than 8,000 active student count definitely appeal to me. Hamburg's lovely campus, professors, and amenities are very appealing. Although I have no personal links at SRH Hamburg, the university's great academic reputation and the opportunity to live among an active community motivate me. The great historical and cultural value of Hamburg fuels my want to study there even more. The probable job opportunities in the nearby market thrill me as companies appreciate SRH Hamburg graduates.

Long term, I hope to advance technology and assist innovative industry solutions by using my experience in data science and analytics. One of **Data Scientist, Data Analyst, or Research Scientist** would be my ideal job. Working intrigues me because I believe the professional settings will let me grow and expand. The demanding academic program and research possibilities offered at SRH Hamburg will definitely provide me with the means to achieve my goals.

I appreciate your considering my application. The idea of helping SRH Hamburg and growing thrills me.

Sincerely,
Bhavan, Baskar
