

Statement of Purpose

Applying for **TU Hamburg's Master of Science in Computer Science** excites me as **Bhavan, Baskar**. My love of computer science has been molded by my academic background and work experience; so, I am keen to further my knowledge and abilities in this exciting discipline. I think my love of computer science and my commitment to study qualify me well for this degree.

The **Bachelor of Technology degree in Information Technology** which I obtained from Anna University Chennai India demonstrated my commitment to academic achievement through my **8.17 CGPA (German Grade: 2.0)**. My undergraduate program consisted of Engineering Chemistry, Programming in C, Digital Principles and System Design, Operating Systems, Computer Networks, Mobile Communication, Cryptography, and Network Security to establish fundamental knowledge of computer science concepts. Before, starting my undergraduate studies, I passed the State Board of School Examinations Higher Secondary Second Year Examination (12th Class) in Tamil Nadu India. My Secondary School Leaving Certificate Public Examination (10th Class) **scores 82.8% (German Grade: 1.7)** from subjects Tamil, English, Mathematics, Science and Social Science at the same board.

I developed my technical abilities by conducting research through the project "**A 3D Steganalytic Computation and Steganalysis Safe Watermarking**." The research initiative examined ways to advance communication network security through enhanced privacy solutions in cryptographic applications. Implementing histogram canisters and Gaussian distribution models through this project enhanced data security standards, a major advancement for the cybersecurity domain. In terms of professional experience, I **interned in Python with Data Science at the National Small Industries Corporation Limited, Chennai, India** in June 2023. I gained practical experience in analyzing data, data visualization, and implementation of machine learning solutions which enhanced my knowledge of the data science processes. I have also completed several technical certifications to improve my skills in the field. I also managed to complete a certified course in **Python programming** offered by CodeChef that enhanced my programming and analytical skills. Also, I took the **Rashtrabhasha Examination in Dakshina Bharat Hindi Prachar Sabha, Madras, India** (April 2017) and got 2nd class rank, which proved my bilingual or multi-lingual skills. To further support my international studies, I have attained an **IELTS overall score of 6.5 (CEFR Level B2)**. Also, I Completed 16 years of Education in the English Language.

The Master's program in Computer Science at TU Hamburg appeals especially to me because of its extensive course and chance to learn from eminent faculty members. I find very interesting modules include Advanced Algorithms, Data Mining, and Machine Learning. Deepening my knowledge of these disciplines and investigating their pragmatic uses excites me. My prior information technology education has adequately equipped me for this degree, and I am sure that the knowledge and abilities I will acquire at TU Hamburg will greatly help me to develop professionally.

TU Hamburg was the choice for various reasons. The institution is the perfect venue for my studies because of its great reputation shown by its ranking and dedication to academic success. Modern facilities and active student body provide a fit for study and personal development. Hamburg's strong cultural legacy and booming IT sector also provide plenty of chances for professional growth. The idea of learning in a city that celebrates variety and invention excites me.

My professional goals call for working for a top IT business as a **data scientist or software developer**. Achieving these objectives will be much aided by the knowledge and abilities the Master's degree in Computer Science at TU Hamburg will provide. Helping initiatives with data security and artificial intelligence really piques my curiosity. Using my abilities to propel technical developments in my own nation, I also want to promote projects like Smart Cities Mission.

Germany's great educational system—especially in the sciences and technology—led me to decide to apply to there. I want to study in a nation that prizes creativity and knowledge. I like Germany's cultural variety and the exposure it gives overseas students. Studying in Germany will assist me to develop personally and professionally. Learning from the greatest and being a part of a society that supports intellectual and personal development excite me. It is the perfect place for my further studies because of the rich German culture and its focus on excellent education.

Finally, I am sure that the Master of Computer Science degree from TU Hamburg will provide me with the knowledge and ability required to reach my professional objectives. My academic background, real-world experience, and love of computer science qualify me well for this program. The chance to contribute to the intellectual community of the institution and learn from eminent faculty members excites me. I am delighted to continue in my academic path at TU Hamburg because I am dedicated to lifelong learning and professional development.

I value your giving my application some thought.

Sincerely,
Bhavan, Baskar
