

Statement of Aim

I go by **Deepak Chittamakki Vijendra**. My love of using technology to address different problems drives me to seek the **Master's degree in Autonomy Technologies at FAU Erlangen**. This program aligns with my academic education, specialist expertise, and pragmatic interests to forward the area and achieve my professional goals.

Currently enrolled in Visvesvaraya Technological University, Belagavi, Karnataka, India, I am working on a **Bachelor of Engineering in Mechanical Engineering**. Up to the sixth semester, I kept a **CGPA of 7.43, which is German equal of 2.2**. Among the disciplines in my classes have been Basic Electronics, Elements of Mechanical Engineering, Fluid Mechanics and Hydraulic Machines, Engineering Thermodynamics, and Innovation and Design Thinking. With a score of **86.08%**, corresponding to a **German grade of 1.6**, I passed my Secondary School Leaving Certificate Examination (Class 10th); with a score of **74.5%**, comparable to a **German grade of 2.1**, I passed my Pre-University Examination (Class 12th).

Along with this, I interned in "**HVAC Design**" with Prinston Smart Engineers and scored a **Grade "A."** This internship gave me real-world HVAC system knowledge and experience, which stoked my passion in manufacturing technology even more. To further my knowledge in world **logistics and supply chain management**, I also finished a course in Logistics Management: International Transport & Shipping from Udemy.

Combining my academic background with personal experiences drives my interest in Autonomy Technologies. During my college program, the courses I took—including Innovation and Design Thinking—piqued my interest about autonomous systems. My internship experiences confirmed my passion even more since they exposed practical problems that autonomous technologies could help to solve. The possibility of autonomous systems to transform several sectors and raise efficiency and safety drives me especially. As a tech worker, the Master's program in Autonomy Technologies at FAU Erlangen will equip me with both necessary character attributes and more technical expertise. The coursework, group projects, and industrial projects will help me to build communication, teamwork, and leadership abilities, so empowering me to lead teams and stimulate creativity in global companies all around.

FAU Erlangen is a perfect venue for my academic and professional growth since it is well-known for its rigorous attention on practice-oriented programs. The university's well-run facilities, committed faculty, and varied course of study produce a favorable classroom. Besides, FAU Erlangen is situated in Germany, a nation known for its technological advancement. This offers a wonderful chance to build strong networks between students and the nearby employment scene. The university is the ideal location for me to follow my professional objectives since it supports, fosters creativity, and has solid ties with companies.

Germany's exceptional technological and innovative facilities caught my attention and therefore I decided to apply for studies there. Since field education in Germany is significantly better, I wish to remain here. I wish to be among the rich German culture, diversity, and good exposure. For my master's degree, I want to study in Germany since the esteemed institutions there provide high-quality education. Studying in Germany will enable me to develop personally and professionally equally. Germany's great research intensity and dedication to support creative technology growth captivate me.

After completing this degree, I want to start working for some multinational technology corporations like **Siemens, SAP, Bosch**, and others where I can be used to produce fresh ideas as well as oversee fresh technical advancements. FAU Erlangen's Master's in Autonomy Technologies will provide me the tools I need to succeed in these positions and significantly influence the industry.

All told, my academic background—including courses, mechanical engineering skills, past internship experience, and other activities—makes me qualified for this program. Therefore, I think that the Master's in Autonomy Technologies at FAU Erlangen will be most suited in helping me to fulfill my outstanding professional objectives and implement a constructive change in the field of technology and innovation.

Sincerely,
Deepak Chittamakki Vijendra
