

Motivation Letter

The chance to compose my declaration of intent excites me. Allow me to present myself as Indian citizen **Deepak Chittemakki Vijendra**. I choose to study a **Master of Science in Supply Chain Management program from SRH Berlin** in order to increase my field-of- expertise. Emphasizing several facets of supply chain management, including operations, procurement, and logistics, this program after finishing this school, I will work in supply chain management as, over time, and this profession will bring intellectual challenges and profitable prospects.

With its rich educational legacy and energetic culture, Germany is the perfect place for my hopes for higher study. My academic interests are intimately related with the modernism of education that rules this nation. It boasts good educational standards and lots of resources. Among the main elements influencing my choice of educational location is the infrastructure, practice-based courses, and industry exposure of Germany. Studying in Germany will expose me to many aspects of practical learning, which will improve my education and equip me to meet the challenges of the outer world. The friendly environment of the nation will help me to feel at ease and guarantee a good stay during my academic path in Germany. Today's focus is on skill and research-based education; this is what German institutions most definitely reflect. Though I have only mentioned a few crucial factors that drove me to select Germany, overall the reasons for my decision are endless.

After performing extensive study, I came into SRH Berlin while looking for the appropriate institute. First of all, the curriculum and its flexibility let students choose courses from a range of possibilities. Learning gains fresh perspective from the facilities and the varied peer group including international students. Highly qualified, experienced, and driven teachers who are passionate about not only imparting knowledge but also giving students a practical and fulfilling learning experience guide the courses offered at this university. Apart from that, the university gives more industry experience to keep me updated about the present developments in the sector. Furthermore fascinating was the active and varied community this university boasts. Here at this university, I will obtain a degree with international recognition that will open a remarkable future. The university's well-organized curriculum, which provides insight into the most contemporary trends and technology, most impressively stands out. These thus are the factors guiding my choice of this educational institution.

Currently enrolled in Visvesvaraya Technological University, Belagavi, Karnataka, India, I am working on a **Bachelor of Engineering in Mechanical Engineering**. Up to the sixth semester, I kept a **CGPA of 7.43, which is German equal of 2.2**. Among the disciplines in my classes have been Basic Electronics, Elements of Mechanical Engineering, Fluid Mechanics and Hydraulic Machines, Engineering Thermodynamics, and Innovation and Design Thinking. With a score of **86.08%**, corresponding to a **German grade of 1.6**, I passed my Secondary School Leaving Certificate Examination (Class 10th); with a score of **74.5%**, comparable to a **German grade of 2.1**, I passed my Pre-University Examination (Class 12th).

Along with this, I interned in "**HVAC Design**" with Prinston Smart Engineers and scored a **Grade "A."** This internship gave me real-world HVAC system knowledge and experience, which stoked my passion in manufacturing technology even more. To further my knowledge in world **logistics and supply chain management**, I also finished a course in Logistics Management: International Transport & Shipping from Udemy.

I would want to relate a narrative from my former internship that helped me to decide on supply chain management. During my HVAC Design internship, I came to see how important supply chain management is to guaranteeing timely material and equipment delivery. This encounter piqued my interest in the industry and inspired me to seek more supply chain management education. Studying this degree at SRH Berlin will, in my opinion, equip me with the technical know-how and social skills required to succeed in this industry. The courses presented—logistics, procurement, operations—have great bearing on my interests and professional objectives. The "International Logistics" module—which addresses worldwide supply chain management techniques and practices—piques especially my curiosity. This course will help me personally by improving my problem-solving and decision-making abilities and professionally by ready me to operate in different supply chain roles.

After school, my future professional path calls for working in several supply chain management positions including **operations manager, procurement specialist, and logistics manager**. I want to work, where supply chain experts are much sought for. By arming me with the required information and abilities, SRH Berlin's Master of Science in Supply Chain Management program will afford me the chance to operate in these capacities. The program's emphasis on industry exposure and practical learning will equip me for the demands of the employment market and support my successful career in supply chain management.

Ultimately, I am excited to continue my graduate studies at SRH Berlin and think I would be a perfect applicant for the Master of Science in Supply Chain Management program. My academic background, work experience, and great will to study in Germany qualify me for this program. Studying at SRH Berlin will, I am sure, give me the information, abilities, and chances required to reach my professional objectives.

Sincerely,
Deepak Chittemakki Vijendra
