

Motivation Letter

I, **Deepak Chittamakki Vijendra** am writing to say how much the **Master of Science in Manufacturing Technology at TU Dortmund** excites me. Belagavi, Karnataka, India, mechanical engineering student now enrolled in Visvesvaraya Technological University (VTU) has always been enthusiastic about manufacturing technology and their uses. With my background and continuous academic path, I think this program will enable me to fulfill my professional objectives and influence the sector.

Currently enrolled in Visvesvaraya Technological University, Belagavi, Karnataka, India, I am working on a **Bachelor of Engineering in Mechanical Engineering**. Up to the sixth semester, I kept a **CGPA of 7.43, which is German equal of 2.2**. Among the disciplines in my classes have been Basic Electronics, Elements of Mechanical Engineering, Fluid Mechanics and Hydraulic Machines, Engineering Thermodynamics, and Innovation and Design Thinking. With a score of **86.08%**, corresponding to a **German grade of 1.6**, I passed my Secondary School Leaving Certificate Examination (Class 10th); with a score of **74.5%**, comparable to a **German grade of 2.1**, I passed my Pre-University Examination (Class 12th).

Along with this, I interned in "**HVAC Design**" with Prinston Smart Engineers and scored a **Grade "A."** This internship gave me real-world HVAC system knowledge and experience, which stoked my passion in manufacturing technology even more. To further my knowledge in world **logistics and supply chain management**, I also finished a course in Logistics Management: International Transport & Shipping from Udemy.

I have taken part in various seminars and obtained technical certifications fit for my academic background. Among these are a "Short Term Industry Ready Program" in Linux run by Ethnus Consultancy Services Ltd. in cooperation with DXC and the Nasscom Foundation. I also fulfilled all "Mobile App Development" prerequisites by means of an ICT Academy assessment. These credentials have given me useful Linux system and mobile app development practical abilities, therefore arming me for advanced study and professional challenges.

My academic path and personal experiences lead me to be interested in manufacturing technologies. I came to see via my internship at Prinston Smart Engineers the significance of effective manufacturing techniques in producing premium goods. This encounter and my mechanical engineering classes have motivated me to seek a better knowledge of manufacturing technologies. Modules like Advanced Manufacturing Processes and Production Planning and Control especially appeal to me since they will equip me the tools and knowledge needed to succeed in this industry. The M.Sc. in Manufacturing Technology at TU Dortmund will, in my opinion, provide me with both technical knowledge and interpersonal skills—qualities important for my personal and professional development.

TU Dortmund appeals to me due of its stellar academic reputation. The university ranks highly in many worldwide rankings, and its great emphasis on research and creativity fits my goals. Modern facilities and a lively student body at TU Dortmund will give me a good academic experience. The university's position in Dortmund, a city renowned for its rich industrial legacy and active culture, also adds to its attraction. Applying has been reinforced by friends of mine who study at TU Dortmund sharing their great experiences. TU Dortmund's well-known manufacturing technology research facilities and esteemed lecturers make this the perfect location for me to further my studies. The chances to visit the attractions of the city and interact with its active employment market fascinate me as well.

Germany's great educational system and strong emphasis on engineering and technology had me applying to there. Germany is where I wish to stay as the caliber of instruction in my field is better. Germany's rich culture and variety will open my horizons and allow me to experience Germany presents lots of chances for both personal and professional development, hence I wish to study there. By really embracing the German way of life, I hope to develop personally as well as professionally. Germany's emphasis on accuracy, efficiency, and creativity—qualities that are absolutely essential for my field of study—resonates with me.

After finishing the M.Sc. in Manufacturing Technology at TU Dortmund, I hope to be employed in positions such **Quality Control Specialist, Manufacturing Engineer, or Production Manager**. I think that the knowledge and abilities acquired in this program will help me to participate properly in the industrial industry. Working in Germany, where I may use the cutting-edge industry methods and latest manufacturing technologies, especially interests me. Becoming a leader in the manufacturing sector will help me to drive efficiency and quality in production techniques over long run.

Therefore, I am sure that the Master of Science in Manufacturing Technology at TU Dortmund will equip me to reach my intended career objectives. I am eager to maximize the chances and join the academic community of the university. The possibility to be at TU Dortmund and focus in manufacturing technology in Germany excites me. I value your giving my application some thought.

Sincerely,
Deepak Chittamakki Vijendra
