

Motivation Letter

Uppendra Singh, Negi is my full name, and I am quite excited to start the **Master of Science in Computer Science - Big Data and Artificial Intelligence program at SRH Berlin**. Having good academics in Computer Applications and professional experience in the IT field, I want to further my knowledge and talents in this area at your esteemed university.

Graphic Era Hill University, India, where I finished my **Bachelor in Computer Applications**, with a **CGPA of 8.47—a German mark of 1.9**. Studying, I covered topics including Programming Concepts utilizing C Language, Data Structures and File Organization, Java Programming, Database Management System, Cryptography, and Computer Graphics. These classes greatly changed my analytical perspective. I have also become somewhat proficient in languages including Python, Java, C, and C++ programming. Having spent 15 years learning English has helped me to improve my communication abilities even more.

At **LTimindtree Limited, India**, I am presently an **Engineer in Cloud & Infra Services**. Installation, configuration, and maintain M365, ITIL, WSUS, MECM, application packaging, OKTA IAM, and patching among other things. I also have background in database administration. These positions have given me useful expertise and the capacity to properly spearhead projects. Further confirming my expertise was **the LTIMindtree Certified Cloud - IT Infrastructure, Cybersecurity Services Professional credential**. I also cleared an assessment on **Expert Java** compliant with competency criteria created by NASSCOM, the IT-ITeS Sector Skills Council.

The Master of Science in Computer Science - Big Data and Artificial Intelligence at SRH Berlin particularly interests me because of my educational background and the career I intend to follow. During my undergraduate studies, working on projects on data structures and cryptography, my obsession with statistics and artificial intelligence started. Essential in the digital age, the curriculum presents a great chance to solve problems like algorithms, machine learning, and data science. The training is meant to give me both theoretical understanding and useful tools so that I may address challenges from daily life. This program will not only help me to grasp particular facets of computation but also introduce me to the most recent developments in the field. This degree will be a steppingstone for my career, enabling me to work on initiatives tackling current IT industry issues.

Germany's highly regarded educational system and strong emphasis on research and development drive me to desire to study there. Germany is where I wish to remain as the field of education here is significantly better. I like to experience the rich German culture and be in a varied intellectual setting. Germany is the country I wish to study master's degree in since the IT sector is fast expanding and offers various job possibilities for computer scientists and IT experts. Engaging some of the top brains in the field will help me both personally and professionally flourish. Experiencing Germany's central point of view in Europe will open me many chances abroad.

SRH Berlin appeals to me since it gives research and quality education top priority. While obtaining an education and in the growth of a person's personality, the university boasts a dynamic and varied student population—a desired quality. The outstanding curriculum and technological support will enable me to reach my academic and professional goals. The outstanding research facilities and eminent academics connected with the program really inspire me. Berlin's energetic city life and many of attractions appeal to me as a study environment. Berlin's local employment scene is booming, and many businesses are hiring recent Computer Science - Big Data and Artificial Intelligence graduates. I think SRH Berlin will offer the intellectual, emotional, and professional gains I'm looking for.

Following my program, I hope to work in roles like **Big Data Analyst, Machine Learning Engineer, or Data Scientist**. I want to work, where there is great need for experts in these domains. The curriculum will provide me the tools I need to succeed in these roles: knowledge and skills Working on creative ideas and cooperating with other experts in the sector would help me to contribute to the solving of practical issues. By means of data-driven solutions, my long-term aim is to become a leading expert in the field of Big Data and Artificial Intelligence, thereby advancing technology and raising the quality of living.

I really think that my educational and professional goals will be satisfied by the Master of Science in Computer Science - Big Data and Artificial Intelligence at SRH Berlin. The idea of being a part of your university's strong intellectual scene excites me SRH Berlin will definitely give me the information and abilities I need to fulfill my dreams and thrive in my career.

I value that you are giving my application some thought.

Sincerely,
Uppendra Singh, Negi
