

## Motivation Letter

**Uppendra Singh, Negi** is my full name, and I am quite excited to start the **Master of Science in Applied Data Science and Analytics program at SRH University Heidelberg**. Having good academics in Computer Applications and professional experience in the IT field, I want to further my knowledge and talents in this area at your esteemed university.

Graphic Era Hill University, India, where I finished my **Bachelor in Computer Applications**, with a **CGPA of 8.47—a German mark of 1.9**. Studying, I covered topics including Programming Concepts utilizing C Language, Data Structures and File Organization, Java Programming, Database Management System, Cryptography, and Computer Graphics. These classes greatly changed my analytical perspective. I have also become somewhat proficient in languages including Python, Java, C, and C++ programming. Having spent 15 years learning English has helped me to improve my communication abilities even more.

At **LTimindtree Limited, India**, I am presently an **Engineer in Cloud & Infra Services**. Installation, configuration, and maintain M365, ITIL, WSUS, MECM, application packaging, OKTA IAM, and patching among other things. I also have background in database administration. These positions have given me useful expertise and the capacity to properly spearhead projects. Further confirming my expertise was **the LTIMindtree Certified Cloud - IT Infrastructure, Cybersecurity Services Professional credential**. I also cleared an assessment on **Expert Java** compliant with competency criteria created by NASSCOM, the IT-ITeS Sector Skills Council.

**Germany's great degree of scientific research and technical development makes me wish to study there.** Germany provides the best educational system, in which facilities and institutions encourage academics to create conversations leading to innovations. The emphasis on using several disciplines in industry-based training courses provides networking chances and practical knowledge. I wish to fully appreciate the great quality of life Germany's people usually live and sink myself into its rich culture. Studying in Germany will help me to acquire the knowledge and experience I will need in the global development of data science and analytics.

**First of all, the university is well-known for offering first-rate Applied Data Science and Analytics courses.** For me, the multidisciplinary approach and the focus on practical learning make this perfect option. Another reason drew me to SRH Heidelberg was its dedication to research and invention shown by its several research institutes and projects. For overseas students, Heidelberg itself is a fascinating place. Renowned for its rich cultural scene, breathtaking scenery, and historical relevance, Heidelberg presents a special fusion of old and new. The city is perfect for me to study and start my career because of its booming tech sector and lots of employment possibilities for recent artificial intelligence grads. I also have a few friends attending SRH Heidelberg, and their great experiences have inspired me even more to apply to this university.

**The demanding course of the Master's program in Applied Data Science and Analytics at SRH University Heidelberg will let me investigate the pragmatic uses of data science.** Classes include Data Mining, Machine Learning, and Big Data Analytics especially pique my curiosity. These classes will enable me to grasp the steps toward data-driven decision-making. Acquiring knowledge of the most recent technologies—data visualization, statistical analysis, and machine learning—will enable me to acquire the required abilities to carry out important research and assist researchers in reaching major scientific goals. Moreover, the course's emphasis on team projects will provide me the chance to engage in multidisciplinary initiatives and acquire abilities needed for effective teamwork, which is particularly crucial in the fast changing field of data science.

**After the Master's program ends successfully,** I will look for work in corporations including **Google, Microsoft, or Amazon as a Data Scientist or Data Analyst**. These businesses offer some of the most fascinating research and production facilities in technology and data analytics that would afford me the ideal surroundings to apply my knowledge and abilities outside of the institution. My goal is to add more value to the field of data science and assist in the development of fresh, workable ideas addressing the requirements of the contemporary society.

Following extensive investigation on the Applied Data Science and Analytics Master's degree at SRH University Heidelberg, I am confident that pursuing this program is the perfect fit for me. Finding answers using statistics and grasping the trends guiding human behavior and corporate decisions excite me. Finally, I appreciate your giving my application some thought.

**I value that you are giving my application some thought.**

Sincerely,  
**Uppendra Singh, Negi**
