

Motivation Letter

My name is **Uppendra Singh, Negi** and **TU Hamburg interests me to pursue a Master of Science in Data Science**. My path through the professional and academic spheres has piqued my strong curiosity for data science. Having a strong academic background in computer applications and practical knowledge in cloud and infrastructure services, I am driven in data science and ready to help the discipline both locally and internationally.

Graphic Era Hill University, India, where I finished my **Bachelor in Computer Applications**, with a **CGPA of 8.47—a German mark of 1.9**. Studying, I covered topics including Programming Concepts utilizing C Language, Data Structures and File Organization, Java Programming, Database Management System, Cryptography, and Computer Graphics. These classes greatly changed my analytical perspective. I have also become somewhat proficient in languages including Python, Java, C, and C++ programming. Having spent 15 years learning English has helped me to improve my communication abilities even more.

At **LTimindtree Limited, India**, I am presently an **Engineer in Cloud & Infra Services**. Installation, configuration, and maintain M365, ITIL, WSUS, MECM, application packaging, OKTA IAM, and patching among other things. I also have background in database administration. These positions have given me useful expertise and the capacity to properly spearhead projects. Further confirming my expertise was **the LTIMindtree Certified Cloud - IT Infrastructure, Cybersecurity Services Professional credential**. I also cleared an assessment on **Expert Java** compliant with competency criteria created by NASSCOM, the IT-ITeS Sector Skills Council.

During my undergraduate studies, especially in classes like Java Programming and Database Management System, my passion in data science started. These disciplines let me realize the great possibilities data offers in addressing practical challenges. One major turning point was my internship project working on cybersecurity at LTIMindtree. I came to see how important data is to improving security protocols and streamlining processes. This encounter confirmed my will to work in data science.

The TU Hamburg Data Science program appeals especially to me because of its extensive course covering both theoretical and practical sides of data science. I really enjoy classes including Big Data Analytics, Machine Learning, and Data Mining. These courses will, in my opinion, equip me with the technical know-how required to succeed on the field. Furthermore, the program's emphasis on practical applications will equip me for the chances and difficulties in the business.

Germany's world-class educational system and great emphasis on research and invention have me wanting to study there. I think Germany provides better chances for development and that its educational system is far better. I wish to be among the rich German culture, diversity, and good exposure. Germany's strong economy—especially in the technology and engineering sectors—led me to decide on it for my master's degree. Studying in a nation that celebrates sustainability and innovation will help me improve both personally and professionally. The dedication Germany has to environmental sustainability and green technologies also fascinates me. German culture, renowned for its accuracy, efficiency, and rich legacy, is something I want to really sink into.

The academic quality and great reputation of TU Hamburg really inspire me. Different rankings place TU Hamburg in great respect for its engineering and technological initiatives. The university is perfect for both intellectual and personal development because of its active student population and modern infrastructure. One buddy of mine who attended TU Hamburg mentioned positively the encouraging instructors and cooperative atmosphere. I find great attraction in the university's research centers and eminent data science experts. Hamburg, with its stunning architecture, varied culture, and busy harbor, particularly piques my curiosity. For recent data science grads, companies such Airbus, Beiersdorf, and many technological startups in Hamburg present great employment opportunities.

After getting my master's degree, I hope to be working in positions including **Data Scientist, Data Analyst, or Machine Learning Engineer**. TU Hamburg's Data Science program will provide me the tools and abilities required to shine in these roles. Want to work, where the employment market for data science experts is booming, especially interests me. Essential for a successful career in data science, the degree will also enable me to acquire critical thinking and problem-solving abilities.

All things considered, I am sure that the Master of Science in Data Science at TU Hamburg will provide me with the intellectual rigor and pragmatic tools needed to achieve in my quest of a job in data science. Participating in and developing inside the active intellectual community of the institution excites me. I value your giving my application some thought. The prospect of maybe entering TU Hamburg and advancing my data science study excites me.

I value that you are giving my application some thought.

Sincerely,
Uppendra Singh, Negi
