

Declaration of Intent

I go as **Uppendra Singh, Negi**. This statement of intent acts as my application to the **University of Gottingen** to seek a **Master of Science degree in Applied Computer Science**.

Graphic Era Hill University, India, where I finished my **Bachelor in Computer Applications**, with a **CGPA of 8.47—a German mark of 1.9**. Studying, I covered topics including Programming Concepts utilizing C Language, Data Structures and File Organization, Java Programming, Database Management System, Cryptography, and Computer Graphics. These classes greatly changed my analytical perspective. I have also become somewhat proficient in languages including Python, Java, C, and C++ programming. Having spent 15 years learning English has helped me to improve my communication abilities even more.

At **LTimindtree Limited, India**, I am presently an **Engineer in Cloud & Infra Services**. Installation, configuration, and maintain M365, ITIL, WSUS, MECM, application packaging, OKTA IAM, and patching among other things. I also have background in database administration. These positions have given me useful expertise and the capacity to properly spearhead projects. I also cleared an assessment on **Expert Java** compliant with competency criteria created by NASSCOM, the IT-ITeS Sector Skills Council.

Beyond academics, jobs and internships have given me invaluable real-world expertise. Under LTIMindtree Limited, I interned streamlining cloud and infrastructure services by layout optimization and assembly time analysis. Further confirming my expertise was the LTIMindtree Certified Cloud - IT Infrastructure, Cybersecurity Services Professional credential. At LTIMindtree Limited, where I am currently employed as Engineer - Cloud & Infra Services, I am actively applying my installation, configuration, and M365, ITIL, WSUS, MecM, application packaging, OKTA IAM, and patching database management abilities.

My computer science undergraduate degree gave me a good basis in fundamental ideas and design techniques. But my internships sparked a love of using these ideas to create automatic answers. Driven by the rising relevance of automation and cybersecurity, this desire drives me to seek a Master of Science in Applied Computer Science at the University of Gottingen. The program's emphasis on intelligent automation, robotic manipulation, and advanced control systems exactly matches my goal to become specialized in this exciting subject. The modules on robot programming and system integration especially excite me since they fit my professional goals of either robotics engineer or automation specialist.

With this advanced degree, I see myself leading companies like **Siemens or Bosch** inventing and executing automated solutions that transform production processes and propel efficiency. The University of Gottingen's stellar reputation, emphasis on research and innovation, German location—a worldwide leader in automation—make it the ideal setting for me to flourish. Working with industry partners, learning from seasoned teachers, and getting practical experience will help me to grow into a well-rounded robotics and automation engineer.

Germany's excellent educational system and chances for both personal and professional development motivate me to study there. Since the field of education in Germany is significantly better, I aim to remain here. I wish to be among the rich German culture, diversity, and good exposure. Germany's great emphasis on research and creativity helped me decide on it for my master's degree. Studying in Germany will give me access to research facilities and modern technologies, thereby helping me to develop professionally. For me, it will open my horizons and let me encounter another culture. Germany's rich history, cultural variety, and dedication to technical development captivate me and have significantly shaped my choice to study here.

Finally, my academic path, real-world experience, and relentless love of applied computer science qualify me strongly for your program. The chance to add to and grow from the active intellectual community of the University of Gottingen excites me.

Ultimately, I would want to thank you for giving my application some thought; from your end, I hope to get a favorable answer.

Sincerely,
Uppendra Singh, Negi
